

NexLevel's Impact System

One of the biggest challenges with learning & development is measuring organizational impact & ROI.

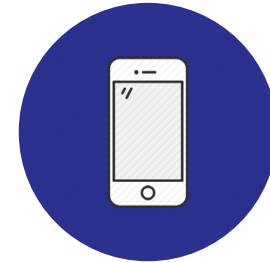

Our Impact System provides irrefutable data that the desired behaviour change is happening and advancing your most important organizational priorities.

NexLevel's Impact System helps:

1. Make Learning Sticky
2. Measure Behaviour Change
3. Prove Impact

Following a workshop...

Your participants are **inspired**.

You've provided great content, unlocked new insights and sparked motivation.

But **change is hard**.

And even the best-intentioned learners often struggle to put the content into practice.

NexLevel's Impact System **supports the learner journey**.

Lock in the learning and engage in regular action and reflection in the weeks following.

Participants **experience real change**.

You have the tools to prove it.

Supporting change and measuring impact in
2000+ programs across 650 companies since 2019.

Activate the desired behaviour changes in your team.

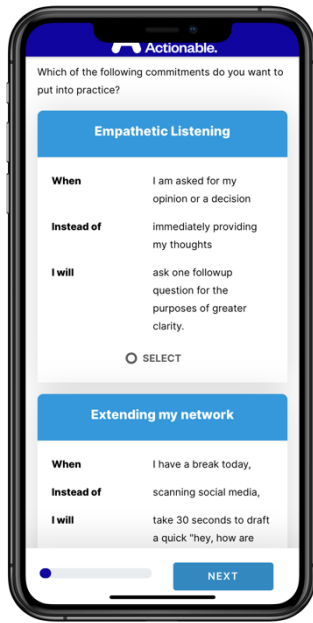

Team members commit to the practice of new skills following the conversations, ensuring desired new behaviours are embedded in individual roles and work.

Habit Builder

Turn learning into new behaviours.

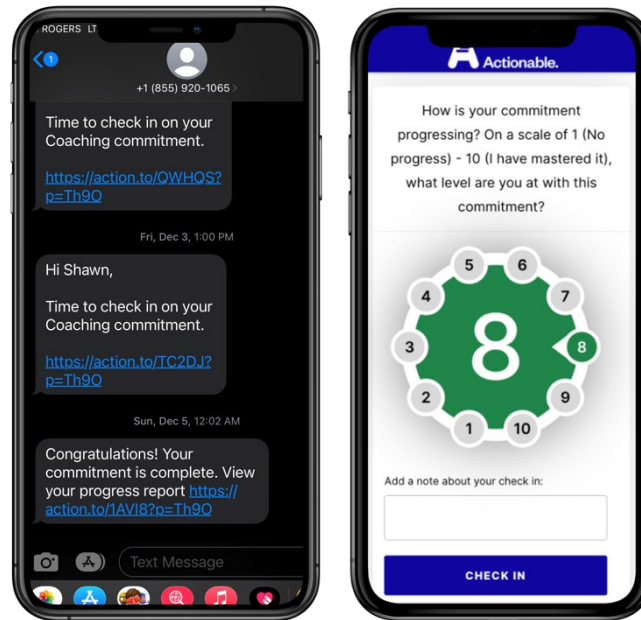

1. Select a Habit

Participants choose a habit to work on at the end of each Learning Session.

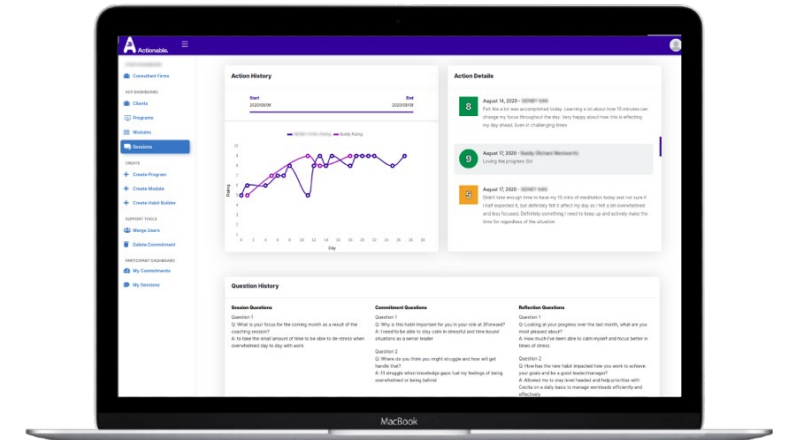

2. Practice Daily(ish)

Participants choose their cadence, receive nudges and log their progress in 2 clicks.

3. Gain Insight

Reporting for all stakeholders: the participant, their manager and the program sponsor

By the numbers

71% session attendees make a commitment in the Habit Builder

82% participants see a positive improvement in their habits

32% average improvement scores

6.2 average # of interactions with the platform / participant

1,100+ programs utilizing the Habit Builder in the last 12 months
