

Interactive Workshop

A fast paced & engaging workshop to identify, and remove, the barriers to high performance teamwork.

Teamwork remains the ultimate advantage, since it's so powerful and difficult to achieve.

- This session provides a simple road-map to immediately overcome the five main obstacles to high team performance.

Objectives:

Based on the Five Dysfunctions of a Team by Patrick Lencioni, teams will:

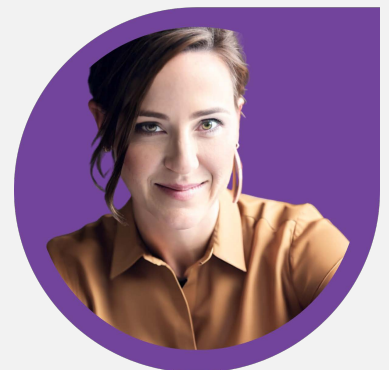

- **Increase vulnerability-based trust** by getting to know each other and improving psychological safety.
- **Get quality work done faster** by not wasting time on the wrong issues and revisiting topics again and again.
- **Make better decisions** by eliminating politics and confusion and increasing productive debate.
- **Keep their best employees longer** since "A" players rarely leave organizations where they are part of a cohesive team.

How does it work?

1. Every team member completes an online team assessment, in advance.
2. A custom color-coded report provides practical & usable data to identify the most critical issues.
3. Key priorities are identified, and team members commit to improve habits that will accelerate the team towards their goals.

Successful teamwork is not about mastering subtle, sophisticated theories, but rather about embracing common sense with uncommon levels of discipline and persistence.
